

Fukushima vs Chernobyl:
annual radiation levels and evacuation

福島原発事故3年 日本	年間被ばく量	チェルノブイリ事故後5年 ウクライナ
帰還できる	20ミリ	
	10ミリ~	強制避難
	5ミリ~	移住の義務
	1ミリ~	移住の権利
	0.5ミリ~	医療支援

In Ukraine:

No entry: more than 10 mSv per year of radiation Zone

The obligation to migrate: more than 5 mSv per year Zone

The right to migrate: more than 1 mSv per year Zone

Entitled to free medical care: more than 0.5 mSv per year Zone

On the other hand in Japan:

Fit to live: Area with less than 20 mSv per year of radiation

Are Japanese more resistant to radiation than Ukrainians?
